

Using the ID card for signing

Testing your ID card

- Make sure your software is installed and working. You can find help here: <https://installer.id.ee/?lang=eng>
- Insert the ID card in the card reader
- If you are not sure if your ID card is working, open the "DigiDoc4" reader. This will test your card

Reading an "asice" or a "bdoc" document

- Save the document somewhere
- Double-click on the document
- When the Digidoc client opens it will show you a list of documents
- Double-click in the Digidoc reader on the document you want to read
- The document will open in the original format

Signing a document with the ID card

- Save the document somewhere
- Right-click with the mouse on the document and choose "sign digitally" (Allkirjasta digitaalselt)
- Choose where to save it (and the name)
- Click "Sign"
- Enter your 5-digit pin
- When you see your signature has been recorded, choose "close".
- Done. You will now see the signed copy with the extension ".asice" or ".bdoc"
